

Rubber Glove Finger Puppets

This craft was submitted by N. Howell. Thank you!

Materials

- An old pair of rubber kitchen gloves (this is a great way to make use of gloves that have a hole in them!)
- Waterproof markers
- Yarn
- Felt scraps
- Googly eyes
- Craft glue

Instructions

1. Cut the fingers off of an old pair of rubber kitchen gloves.
2. Using yarn, felt, eyes and markers, turn the fingers into finger puppets!
3. You can use the fingers turned inside out if you want your puppet to be white instead of the colour of the gloves.
4. You can create the examples provided on this page, or come up with your own finger puppet designs: use your imagination and see what you can come up with!
